<b>Description</b>			
When the old syntax doc('html:document') is used in place of ixsl:page(), for example in the knight's tour stylesheet, a NullPointerException occurs.			
Controller.registerDocument() is called with a null value for the doc argument.			

### History

---

#### #1 - 2013-02-22 22:47 - Michael Kay

- Subject changed from NullPointerException usin doc() to NullPointerException using doc()

Fixed by replacing the reference to the uninitialized variable hostPage in Configuration.buildDocument() with a call on Configuration.getHostPage().

#### #2 - 2013-08-26 15:11 - Michael Kay

- Status changed from New to Resolved
