

Saxon/C - Bug #2637

PHP build config still using old library naming: libsaxon.so

2016-02-22 17:03 - O'Neil Delpratt

Found in version:	1.0.0	Platforms:	
Fixed in version:	1.0.1		

Description

The config.m4 file seems to assume the library name libsaxn.so under /usr/lib. In Saxon 1.0.0 we have renamed the library to libsaxonhec.so for HE and similar naming for PE and EE. The build config file needs to change to match the new naming convention.

The workaround is to create symlink of the library libsaxonhec.so to libsaxn.so under '/usr/lib'. Similar fix to PE and EE.

Patch will be available in the next maintenance release.

History

#1 - 2016-02-22 19:14 - O'Neil Delpratt

- Category set to PHP Build
- Status changed from New to Resolved
- % Done changed from 0 to 100

Added new config.m4 files for the different editions to point to the new library file names under linux. Committed to subversion and available for next maintenance release.

#2 - 2016-04-07 17:53 - O'Neil Delpratt

- Status changed from Resolved to Closed
- Fixed in version set to 1.0.1

Bug fix applied in the Saxon/C 1.0.1 maintenance release.
