<b>Category:</b>	PHP API	<b>Estimated time:</b>	0:00 hour
<b>Sprint/Milestone:</b>		<b>Spent time:</b>	0:00 hour
<b>Found in version:</b>	1.1.0	<b>Fixed in version:</b>	
<b>Description</b>			
A user of Saxon/C in PHP tried to use an XdmAtomicValue directly in a string concatenation.			
This failed with the error:			
<pre>PHP Recoverable fatal error: Object of class Saxon\\XdmAtomicValue could not be converted to string in /var/www/html/web/php/make-course-catalog.php on line 32, referer: http://localhost/web/index.html</pre>			
It would be good in the next release of Saxon/C to add PHP magic methods for the Xdm APIs			

### History

#### #1 - 2019-01-30 11:58 - O'Neil Delpratt

- Description updated

#### #2 - 2019-03-27 12:55 - O'Neil Delpratt

- Status changed from New to In Progress

Update:

I have now added the PHP \_\_toString. Now reviewing if we should add any other PHP magic methods.

Testing also required.
