#### Description

I noticed that the simple XQuery () => apply([]) gives a NullPointerException in Saxon. Shouldn't it raise XPTY0004?

```
java -cp 'C:\Program Files\Saxonica\SaxonHE10-2J\saxon-he-10.2.jar' net.sf.saxon.Query -qs:" () => apply([]) "
```

```
<?xml version="1.0" encoding="UTF-8"?>java.lang.NullPointerException
  at net.sf.saxon.functions.ApplyFn.call (ApplyFn.java:128)
  at net.sf.saxon.expr.FunctionCall.iterate (FunctionCall.java:548)
  at net.sf.saxon.expr.Expression.process (Expression.java:949)
  at net.sf.saxon.expr.SystemFunctionCall.process (SystemFunctionCall.java:481)

  at net.sf.saxon.s9api.XQueryEvaluator.run (XQueryEvaluator.java:370)
  at net.sf.saxon.Query.runQuery (Query.java:895)
  at net.sf.saxon.Query.doQuery (Query.java:423)
  at net.sf.saxon.Query.main (Query.java:97)
```

```
Fatal error during query: java.lang.NullPointerException: (no message)
```

It is not particularly meaningful to pass the empty sequence but I guess Saxon doesn't want to acknowledge that with a NullPointerException and furthermore in real code using function-lookup(..) => apply([..]) it is easy to end up with an empty sequence erroneously passed in.
