

## Saxon - Bug #4869

### -TP profile output is not available when running from a SEF file

<b>Description</b>			
Generation of -TP output relies on trace instructions being compiled into the stylesheet, and these instructions are not exported when generating a SEF file. This means it is not possible to compare the profile for the SEF and non-SEF cases.

Also, -TP output is incomplete if tail call optimisation is enabled. See bug [#4867](#).
