Please supply a source document that demonstrates the problem.

How are you running the query (your specific sequence of API calls)?

#2 - 2021-09-20 14:08 - Dipak Shinde

When we use \$variable for further use in for loop, then it works fine. Please guide why this happen.

#3 - 2021-09-20 14:11 - Dipak Shinde

When I am execute in application, then application will crash. Now I am trying it in Query.exe

#4 - 2021-09-20 14:13 - Michael Kay

Dipak, we can't help you unless you provide more detailed information. We can't guess what you are doing. You need to show us enough code so we can reproduce the effect you are seeing.

#5 - 2021-10-05 23:09 - Michael Kay

- Status changed from New to AwaitingInfo

Marking this "AwaitingInfo". We will not be able to make progress on this without a clear statement of what you are doing and how it fails.

#6 - 2021-10-16 00:18 - Michael Kay

- Status changed from AwaitingInfo to Closed

Sorry, I'm closing this because despite our request, you haven't explained what steps we need to take to reproduce this problem.
